Special Contributions
TAKESHI KUNIO ................................................................. 3
TAICHI FUJI ................................................................. 4
YOSHIO FUJIMURA ................................................................. 5
TOSHIHIKO SUMINOKURA ................................................................. 6

Review
HIDETOSHI NAKAYASU ........................................ 7

Original Papers
MITSUNORI MIKI ................................................................. 21
MANABU KANEMITSU,
YASUSHI MIYANO & TAKESHI KUNIO ........................................ 31
MINORU SHIMBO,
YASUSHI MIYANO & TAKESHI KUNIO ........................................ 39
SUGURU SUGIMORI,
YASUSHI MIYANO & TAKESHI KUNIO ........................................ 45
YASUSHI MIYANO, SHOZO NAKAMURA,
HITOSHI YOKONO & TAKESHI KUNIO ........................................ 51

Editor’s note : The Purpose and Goals, and the Organization of
Materials System Research Laboratory ........................................ 57
Briefs of the members of the Materials System Research Laboratory ........................................ 58

Application of Statistical Method on Stuctural Design
Material Design of Composite Laminates with Constraint on In-plane Elastic Properties
Influence of Matrix Resin on Ultimate Strength of Unidirectional CFRP
Explanation with Viscoelastic Model for the Growth Mechanism of Residual Stress in Thermosetting-resin Beam by Quenching
Photoviscoelastic Analysis of Thermal Stress in Epoxy-resin Beam by Quenching
Experimental Studay on Expedient Optical Method for Residual Stress in Thermosetting-resin Beams by Quenching on Both Surfaces
Volume 2, June 1983

Foreword
YASUSHI MIYANO ................................................................. 1

Special Contributions
TAKESHI KUNIO ................................................................. 3
TAICHI FUJI ................................................................. 5

Reviews
KUNIHIKO FUJIMOTO ........................................ 9
YASUSHI MIYANO, SUGURU SUGIMORI & TAKESHI KUNIO 21
HIDETOSHI NAKAYASU ........................................... 35

Material Design of Rubber Composite Materials
Two-Dimensional Photoviscoelasticity
A Draft on Materials System Design Considered as Synthesis

Original Papers
KOUETSU YAMAZAKI, JUHACHI ODA ............ 49

SUSUMU TSUZUKU, HITOSHI YOKONO,
YASUO HIRA, MASAO GOTOH &
YASUSHI MIYANO ........................................ 61

A Design Technique to Generate Optimum Layout of Minimum Weight Truss Structure
Simulation of Foaming Process in Reaction Injection Molding
Dependence of Temperature on Transverse Low Cycle Fatigue Strength of CFRP

Technical Reports
MITSUNORI MIKI ........................................ 81

MINORU SHIMBO, YASUSHI MIYANO & TAKESHI KUNIO .... 91

Optimum Design of Composite Beam with Sandwich Structure
— Investigation of the Behavior of the Solution and a Proposal for Practical Design —
Effect of Viscoelastic Behavior on Residual Stress Thermosetting-resin Strip with Constraint of Warp by Single-side Quenching

MAKOTO IIDA, MASAO GOTOH, HITOSHI YOKONO & YASUSHI MIYANO 101

Flexural Properties of Moldings of Rigid Polyurethane RIM

Editor’s note ................................................................. 109
Volume 3, July 1984

Special Issue on Materials Design of Fibrous Composite Materials

Forewords
YASUSHI MIYANO .......................................................... 1

HIROO MIYAIRI .......................... 69
YOICHI HIRANO ....................... 75
MITSUNORI MIKI ...................... 83

On the Material Design in Future
Materials Design in 21st Century
Notes on Some Properties of Fiber Reinforced Plastics
The Status and Future Trend of Material Design of Fibrous Composite Materials
Special Design Considerations on the Bottom Shell of High Speed FRP Boat
On Optimum Techniques of Shape and Material Designs for Mechanical Structures
Optimum Design for the Strength of Fibrous Composite Materials
Materials Design of Hybrid Composites
Impact Design of Fiber Reinforced Composites
Optimum Design of Laminated Composite Structural Elements
Stiffness-based Material Design and Optimization for Laminated Composites

Engineering Papers
IPPEI SUSUKI & STEPHEN W. TSAI ...... 99
MASUJI UEMURA ................... 107
SHIGEKO KOBAYASHI ............. 121

Designing with Composite Materials
Optimum Design of Filament-wound Pressure Vessel
A Study on Prevention of Divergence of Sweptforward Wing by Fiber Reinforced Composite Materials
Probabilistic Design of Fiber Reinforced Composite with First Order Second Moment Method
Vibration Characteristics and Optimization of Laminated Composite Plates
A Study on Material Design of Matrix Resin for Unidirectional CFRP

YASUSHI MIYANO, MANABU KANEMITSU & TAKESHI KUNIO ........... 143
Volume 4, June 1985

Foreword
YASUSHI MIYANO ................................................................................................................. 1

Special Contributions
TAICHI FUJI ............................................................................................................................ 3
YASUSHI MIYANO ....................................................................................................................... 5

Reviews
HIROSHI FUKUDA ........................................... 13
Developments of Micromechanical Strength Theory of Composite Materials
HIDETOSHI NAKAYASU & SUGURU SUGIMORI ......................................................... 27
Paper Survey with respect to Materials System

Technical Papers
AKIRA NAKAYAMA & TAKAO NAKAGAWA ................................................. 35
Optimum Reliability Design of Composite Materials by Using Stochastic Finite Element Method
ZENICHIRO MAEKAWA ............................................. 45
Influence of Reinforcement on Variation of Strength of Fiber Reinforced Plastic Laminate with Notch
MINORU SHIMBO, YASUSHI MIYANO & TAKEJI KUNIO ................................. 51
Residual Stress and Deformation of Thermosetting Resin Molds under Various Cooling Conditions

Technical Notes
MITSUNORI MIKI & TAICHI FUJI ............... 61
Material Design of Laminated Fibrous Composites with Required Bending-Twisting Coupling
MANABU KANEMITSU, YASUSHI MIYANO & TAKEJI KUNIO ............................ 67
Time and Temperature Dependences of Flexural Strength in Cross-ply Laminated CFRP
HIDETOSHI NAKAYASU & KAZUYA KAMINO ......................................................... 73
Development of Data Processing and Management Information System in Composite Fatigue Testing

Book Reviews .......................................................................................................................... 43
............................................................................................................................................... 50
Volume 5, July 1986

Foreword
YASUSHI MIYANO ................................................................. 1

Special Contributions
TAKESHI KUNIO ................................................................. 3
TAICHI FUJII ................................................................. 5

Reviews
TAKEHITO FUKUDA ......................................................... 7

SUGURU SUGIMORI, YASUSHI MIYANO & TAKESHI KUNIO .... 43

Technical Paper
MINORU SHIMBO, YASUSHI MIYANO, C. E. MANESCHY & T. C. WOO ......... 51

Technical Note
YOICHI HIRANO, AKIRA IINO & HISASHI IYAMA ................................ 59

Technical Reports
KIYOSHI MIZUKAWA, TAICHI FUJII, KATSUHIKO OSAKA & KAZUO ITAMI .... 65
SHIGEO AMAGI & YASUSHI MIYANO .................................... 69

Index for 1982~1986 .................................................................. 77
Personnel of MSRL .............................................................. 81
List of Published Articles of MSRL .......................................... 87
Volume 6, October 1987

Forewords
YASUSHI MIYANO ................................................................. 1
TAKEHI KO KUNIO ............................................................... 3

Special Contribution
TAICHI FUJI ................................................................. 5

Special Issue on Viscoelasticity

Reviews
TAKEHI KO KUNIO ......................................................... 7

- Mechanical Behavior of Viscoelastic Body
  Dependent on Time and Temperature

- Fundamentals of Viscoelasticity

- Introduction to Mechanics of Linearly
  Viscoelastic Body

- Characterization of a Viscoelastic Materials

- Residual Stress of Plastics due to Thermo-
  viscoelastic Behavior

- Basic Concepts for Crack Threshold in
  Viscoelasticity

- Stress and Strain Analysis by Photoviscoelas-
  tic Technique

- Cumulative Damage in a Thermoplastic
  Polymer

MASAHISA TAKASHI & TAKESHI KUNIO .................................. 21

AKIHIRO MISAWA ................................................................. 49

YASUSHI MIYANO & MINORU SHIMBO ... 81

AKIHIRO MISAWA & TAKESHI KUNIO .................................. 101

YASUSHI MIYANO, SUGURU SUGIMORI
& TAKESHI KUNIO ...................................................... 117

MASAHISA TAKASHI .............................................................. 139

Engineering Papers
MASATAKA TANAKA & HIROAKI ASAHI ...................................... 157

- New Boundary Element Methods for Thermo-
  elastic Problems

TAKASHI AKASAKA & MITSURU KATOH .................................. 163

- Fiber Crossing Angle Variation and Elastic-
  Moduli Distribution of Fabric-Reinforced-Rubber
  Diaphragm due to Forming Process

YOHTARO MATSUO, SHIGENARI OHSAWA,
KOICHI YASUDA, TATSUO ACHIWA & SHIUSHICHI KIMURA ........... 169

HARUO NOSE, ISAMU SAKAMOTO & HIDEAKI NAKAYAMA ............. 181

- The Effect of Grain Size on Mechanical Properties
  of TiO

- Fatigue Strength of SCM 435 Alloy Steel under
  Fully Reversed Impact Torsional Load

Technical Paper
TAKEHITO FUKUDA, KATSUHIKO OSAKA,
TAICHI FUJI & YUUZOU HAYAKAWA ... 189

- Statistical Examination of Tensile Strength of
  Glass-Mat FRP by Using Rectangular Specimens

Special Contributions
TOSHI OGAWA ................................................................. 195

- On Participation in Pittsburgh Conference
  — Progress in Analytical Instruments and
  Measuring Techniques in Chemistry —

HIDETOSHI NAKAYASU .................................................... 199

- On Stay in Technische Universität München

YASUSHI MIYANO ............................................................ 205

- On Stay in Universite de Poitiers, France
Volume 7, August 1988

Foreword
YASUSHI MIYANO ................................................................. 1

Special Contributions
TAKESHI KUNIO ................................................................. 3
TAICHI FUJI ................................................................. 5

Reviews
JUHACHI ODA ......................................................... 7
MITSUNORI MIKI & YOSHIHIKO SUGIYAMA ............ 17
MEGUMU SUZUKI ..................................................... 23
SUGURU SUGIMORI, SYOUZOU NAKAMURA,
YASUSHI MIYANO & TAKESHI KUNIO ........ 31

Recent Advance of Techniques Measuring Contact Stress Distributions
Basic Investigation on Structural Design by Smalltalk
Frequency Analysis of Acoustic Emission Generated in Composite Materials
Simplified Optical Method for Measuring Residual Stress in Two-Dimensional Thermosetting Resin Molding

Engineering Papers
SHIGEO AMAGI, MASAYUKI NAKADA,
MINORU SHIMBO & YASUSHI MIYANO .......... 43
HIDEAKI NAKAYAMA, YOSHIO OHUE,
KENZOH TAZAWA, KOHZOH OKITA &
MASATOSHI ARITOSHI ........................................ 53

Influence of Laminate Constitution on Impact Behavior of C/A Hybrid Unidirectional FRP Laminates
Fatigue Crack Growth Characteristics of SUS 304/SUS 304 Friction Welded Butt Joint

Technical Papers
MASAHIRO NISHIHARA ........................................... 59
CHIAKI HIWA, TAKAO NAKAGAWA &
SHUN’ICHIUEDA .................................................. 67
TOSHIYASU FURUTA, SUSUMU USHIGOME,
KUNJI YAMAMOTO & TOMOMI SOEDA ......... 73

Interlaminar Fracture Toughness of CFRP Laminates and Its Simplified Evaluation Method
Loss Tangent of Composites during Fatigue
Silicon Carbide Powder Reinforced Aluminum Alloys

Special Contributions
MASAKI HOUJOU ................................................................. 81
HIDETO SUZUKI & HIROSHI TSUNOI ......................... 85
Volume 8, August 1989

Foreword
YASUSHI MIYANO .................................................................................................................. 1

Special Contributions
TAKESHI KUNIO ..................................................................................................................... 3
HIDETOSHI NAKAYASU .......................................................................................................... 7

Reviews
TAKUO HAYASHI ................................................. 9

A Review of Recent Experimental Stress Analysis in Japan

SUSUMU TAKAHASHI &
AKIRA SHIMAMOTO ......................23
HIDETOSHI NAKAYASU ..................41

A Survey of Recent Photoplasticity
Some Problems for Stochastic Materials Design of Composite Materials
Discrete Optimization Technique with Neural Networks and Its Application to Structural Design

MITSUO KISHI & TASUKAZU HIDAKA 51

Review of Laminated Steel Plate for Vibration Damping

TOSHIRO OGAWA &
MANABU MARUYAMA ..........................59

Optimization of Mechanical Properties of Composite Foamed Structures
Polypropylene Composites

MAKOTO IIDA, YASUSHI MIYANO &
MASAO GOTOH .................................69

Computerized Test Method for Near-Threshold Growth of Delamination Fatigue Cracks under Mode I Loading in Advanced Composite Laminates

OSAMU FUKUI .................................77

Papers
IPPEI SUSUKI .................................101

Strength Optimization of Symmetric Laminate under In-Plane Loading

SOTOAKI KIDA .................................109

Impact Bending Behavior and Its Criterion of Beams and Plates made of Brittle Materials

SATOSHI SOMIYA &
TAKESHI KUNIO ...............................115

Fatigue Fracture Mechanisms on FRP(SMC)

Special Contribution
MITUNORI MIKI ........................................121
Volume 9, August 1990

Foreword

YASUSHI MIYANO .................................................................................................................. 1

Special Contributions

Transformation of Design Points into the Standardized Spaces for Systems Reliability-Based Design

Application of Knowledge Engineering Method to Environmental Strength of Metals

Composite Materials in the Boron Nitride-Copper System

Effects of Fiber Orientation on Interlaminar Shear Strength in CFRP Laminates

Evaluation of In-Plane Mixed Mode Fracture Toughness Tests in Unidirectional FRP —Fracture Simulation by Considering Crack Propagation—

Analysis of Effective Properties of Composite Materials using Homogenization Method based on General-Purpose FER Code

Photoviscoelastic Stress Analysis in a Strip Plate under Rolling Contact

A Study of the Tensile Behavior for Conical Shaped FRP Joints Using Polymeric Adhesives

Effect of Cold Rolling on Cold Drawing of Solid Polymer

Study on Partial Reinforcement Effect of Laminate Film Used in Liquid Packing Bag

Influence of Molding Conditions on Residual Stress in Injection Molds

Foreword
YASUSHI MIYANO .......................................................... 1

Special Contribution
TAKESHI KUNIO ............................................................... 3

Reviews
HIROO MIYAIRI......................................................... 5

Evaluation of Adhesive Properties of High-Cured
Restorative Composites and Their Properties

MASAYUKI NAKADA, NAOYUKI SEKINE
& YASUSHI MIYANO ..................................... 13

Accelerated Testing Methodology for Durability
of Composite Materials and Structures

Papers
HIDEKI SEKINE, KYOJI SHINTATE
& HIDEKI YANAGIDA ................................. 21

Geometric Optimization for Maximizing Structural
Stiffness of 3-D Arm-Like Variable Geometry
Trusses Subjected to an External Static Load

SHINJI OGIHARA, TOSHIKI KANAI
& HIROSHI TSUDA ................................. 31

Nonlinear Behavior in Stress-Strain Relation of
Carbon/Bismaleimide Laminates

YOSUKE NISHITANI, ISAMU SEKIGUCHI,
SHIN HIRIUCHI & TAKESHI KITANO .......................... 39

Morphology and Physical Properties Study on
Ternary Blends of Epoxy, Poly (ether sulfone) and
Acrylonitrile Butadiene Rubber

CHIAKI HIWA, JUN KODAMA,
YOSHIKAZU NAKAI
& YOSHIMICHI FUJI ............................ 55

Effect of Interfacial Strength on Fracture
Toughness of GFRP under Acid Environment

HIROSHI HATTA, DAIKÜKE MARUYAMA
& YASUO KOGO .................................. 59

Formation of SiC Coating on Surface of C/C
Composite by Conversion Method

KENJI NAGATA, HO-GYU YOON,
MITSUHARU INABA
& KIYOHISA TAKAHASHI ........................... 67

Effects of Surface Treatment of Carbon Black on
Electrical Resistivity of Carbon Black Filled
Polypropylene/Polyethylene Polymer Blend

TOMOAKI ISHIKURO
& SHIN-ICHI MATSUOKA .......................... 73

Development of Alkali Resistance of Aluminum
Anodic Oxide Film by Hydrothermal Treatment
FRP Recycling using Depolymerization of
Unsaturated Polyester

KATSUJI SHIBATA .......................................... 79

Technical Report
YOSHIMICHI FUJI, MACHIKO MIZOGUTI
& HIROYUKI HAMADA .............................. 87

Case Study of Degraded GFRP II
— 12 Years used GFRP Stack for Exhaust Gas —
Forewords

& EIICHI YASUDA ................................. 67
KENJI NAGATA, MASANOBU NAKASHIMA,
SYUNSUKE KAWAI, AKIRA AOYAMA
& KIYOHISA TAKAHASHI .............. 73

Detection of Impact Damage and Displacement Behavior of CFRP by using Optical Fiber Sensor
Fast Speed Strain Measurement using Fiber Bragg Gratings
On the Composite Interfacial Strength Evaluation using a Cruciform Specimen
Environmental Effects on Damage Tolerance Performance of CFRP Laminate for Marine Use
Accelerated Testing for Long-Term Durability of Innovative CFRP Laminates for Marine Use
Mechanical Properties of Multi-Axial Knitted CFRP Laminate Molded by VARTM
Study of Quality Stability of Special Plastics in Practical Material Recycling
The Development of Carbon Fiber Reinforced Silicon Oxycarbide Ceramic Matrix Composite derived from Phenylsilsesquioxane Hybrid
Effect of Cationic Surfactants on Mechanical Properties of Poly (Vinyl Alcohol) / Clay Nanocomposite Films
Volume 25, February 2007

Foreword
YASUSHI MIYANO .......................................................... 1

Review
SUSUMU NAKANO & MINORU SHIMBO .................................. 3

Application of Time-temperature Superposition Principle on Cell Density of Foamed Plastics

Papers
KEN GOTO, HIROSHI HATTA, ICHIRO SHIOTA & TERUFUMI MACHIDA ........... 11

High Temperature Tensile Strength and Creep Behavior of Carbon-carbon Composites

KEIJI OG1, HIROKI INOUE, TETSURO SHIRAISHI & MASAHIRO FUJIMURA .... 19

Temperature Dependence of Electric Resistance in CF/PES and CFRP/PES Composites

SATOSHI KOBAYASHI & SHINJI OGIHARA ...................................... 29

The Effect of Matrix Resin on the Burst Strength of FW-Hybrid FRP Composite Pipes after Impact

SHINJI OGIHARA, AKIHISA OKADA & SATOSHI KOBAYASHI .................... 35

Evaluation of Mechanical Properties in Biodegradable Composites Reinforced with a Natural Fiber

KENJI NAGATA, KIYOHISA TAKAHASHI, YUHAK OZEKI, MAYUMI KAWAMURA & HEUNG SOO YOON ........................................... 43

Preparation of Waste Sericin Films Modified by Isocyanate Compounds and Tensile Properties and Biodegradability

YOSUKE NISHITANI, ISAMU SEKIGUCHI, SHIN HORIUCHI & TAKESHI KITANO .... 53

Fabrication and Physical Properties of Long and Short Fiber Reinforced Ternary Blends of Epoxy, Poly (ether sulfone) and Acrylonitrile Butadiene Rubber

MASAKI FUJIKAWA, TAKAO MIKAMI, MASAHIRO TAKASHI, YASUKO MIHARA & TAKAYA KOBAYASHI .................................................. 65

Prony Series Approximation Technique for Storage/Loss Modulus with a Smoothness of the Relaxation Spectrum

Special Issue on Long-Term Durability and Damage Tolerance of Marine Composites

Technical Reports
YASUSHI MIYANO & MASAYUKI NAKADA ........................................ 71

Long-Term Durability and Damage Tolerance of Innovative Marine Composites (NICOP) Part I: Accelerated Testing for Long-Term Durability of Various FRP Laminates for Marine Use

ISAO KIMPARA & HIROSHI SAITO ............................................. 83

Long-Term Durability and Damage Tolerance of Innovative Marine Composites (NICOP) Part II: Post-Impact Fatigue Behavior of Woven and Knitted Fabric CFRP Laminates for Marine Use
