“Materials System” had been published from 1982 as an annual journal mainly in Japanese by Materials System Research Laboratory, Kanazawa Institute of Technology. However, the publication of “Materials System” was suspended with the publication of Vol. 35 in 2017, in order to discuss its information transmission way again. Here, in view of the importance to spread the information, knowledge or methodologies on the materials system, we decided to publish “Materials System” as an annual journal in English from Vol. 36 by means of the combination of the printing and the electrical publication in the J-Stage. You could contribute to develop the analysis and design of the materials system by the submission of your articles to “Materials System”. We cordially invite you to submit articles on the topics to share your achievements and experience with our interested readers and researchers.
