Example for Materials System

by

Yasushi MIYANO, Masayuki NAKADA and Mototsugu TANAKA
(Materials System Research Laboratory, Kanazawa Institute of Technology, Yatsukaho, Hakusan, Ishikawa, Japan)

Abstract

After the single 9pt line spacing under authors' names and affiliations, the abstract of your article should be written in one column with single line spacing using 9pt letters Times New Roman. The abstract should not exceed 300 words. The content of the abstract should state briefly the purpose of the research, the principal results and major conclusions. The heading should be centered and written using boldface letters. The text of the abstract should be aligned using the justification mode to the column width.

(Received xxxxxx xx, 2025)

Key Words: xxx, xxx, xxx, xxx, xxx, xxx

1. General Information

The article must be written in English using A4 ISO format (29.7 cm x 21 cm). The margins are 21 mm on the all sides of the text. The article format must follow the Word template. Please use the "spell-check" and "grammar-check" functions of your word processor to avoid unnecessary errors. The final text file has to be translated into the Portable Document Format (PDF) before submission. After the acceptance of the publication of the submitted article, the authors will be required to send the final version (camera-ready) of both Word and PDF files of your article and the agreement form of copyright transfer.

Your article should be entitled by the concise title, which represents its contents accurately. The title of the article must be written in one column with single line spacing using 16pt boldface letters Times New Roman. If your article has the subtitle, it should be written in one column with single line spacing using 14pt boldface letters Times New Roman after the single 12pt line spacing under the title. The title and subtitle should be centered. After the single 9pt line spacing, "by" using 12pt letters Times New Roman (centered) and the single 9pt line spacing under the title or subtitle, the authors' name must be written in one column with single line spacing using 14pt letters Times New Roman. After the authors' names, the authors' affiliations should be written in one column with single line spacing using 9pt letters Times New Roman. The authors' names and affiliations should be centered.

After the two 9pt line spacing under the keywords, the main text should be written in two-column with the column separation of 7 mm and single line spacing using 9pt letters Times New Roman. The main text of your article should include a proper introduction, information about material and methods, results, discussion and conclusion. The article should be divided into clearly defined and numbered sections. Please use the following scheme: 1.1. (then 1.1.1., 1.1.2., …), 1.2., etc. All data should be given in SI units. The headings should be centered and written using boldface letters. The subheadings should be written in boldface letters using the justification mode to the column width. The main text should be aligned using the justification mode to the column width. Sections and subsections should be separated with one 9pt line spacing.

In case of any issues about the instructions for the layout of the article, please contact the editorial board of Materials System via email (mototsugu@neptune.kanazawa-it.ac.jp).

2. Detailed Information

2.1 Key words

After the single 9pt line spacing under the abstract, 5 -10 keywords should be listed in one column with single line spacing using 9pt letters Times New Roman. The keywords should not exceed 140 characters. The heading should be written using boldface letters and followed by a colon and key words. Keywords should be aligned using the justification mode to the column width.

2.2 Figures and tables

The figures and tables should be prepared in black-and-white in principle. All figures and tables must be numbered consecutively with their appearance in the text, captioned and centered. (Please use the following scheme: Fig.1, Table II.) At least the single 9pt line space should separate the upper part of the figure and the figure caption from the surrounding text. The same requirements also should be applied to tables. The caption should be centered and written using 9pt Times New Roman. The caption should comprise a brief description of the illustration or table. Please make sure that figures are in acceptable resolution and diagrams are labeled with uniform lettering and sizing.

Table 1. xxxxxxxxxxxxxxxxxxxxxxxxxxxxx.

2.3 Equations

All equations must be numbered flush right, using Arabic numbers in parentheses. Variables are to be presented in italics and must be clearly defined in the text.

$$D_c = \frac{4bh^3\delta}{P_0 L^3} \quad (1)$$

2.4 Acknowledgment and references

A paragraph (optional) at the end of the article previous to the references may be attached for acknowledgments. If necessary, footnotes for the main text should be placed at the bottom of the corresponding page by dividing from the main text using a line. Footnotes for figures and tables should be placed just below them. Please use the following scheme: *1.

The references should be placed at the end of the article. The heading should be centered and written with single line spacing using 9pt boldface letters Times New Roman. References should be aligned using the justification mode to the column width with single line spacing using 9pt letters Times New Roman. References should be quoted in the text by numbers ([1], [2, 3] or [1-3]) and grouped together in the list of references in numerical order. For the style, please consult the references shown hereafter in a list of references including a journal paper [1], a book [2] and a conference proceeding [3]. All the authors of references should be listed without omission using “et al” for example. The first characters of the all words of the book name, journal name, publisher name, and so on should be written in capital letter, excluding prepositions. The accuracy of the references in the article is under the full responsibility of the authors of the article.
